Interpreting the feelings of other people is not always easy, as we all know, and we (66) \_\_\_ as much on what they seem to be telling us, as on the actual words they say. Facial (67) \_\_\_ and tone of voice are obvious ways of showing our (68) \_\_\_ to something, and it may well be that we unconsciously express views that we are trying to hide. The art of being (69) \_\_\_ lies in picking up these signals, realizing what the other person is trying to say, and acting so that they are not embarrassed in any way. For example, we may understand that they are in fact (70) \_\_\_ to answer our question, and so we stop pressing them. Body movements in general may also indicate feelings, and interviewers often pay particular attention to the way a candidate for a job walks into the room and sits down. However it is not difficult to present the right kind of appearance, while what many employers want to know relates to the candidate's character traits, and (71) \_\_\_ stability. This raises the awkward question of whether job candidates should be asked to complete psychological tests, and the further problem of whether such tests actually produce (72) \_\_\_ results. For many people, being asked to take part in such a test would be an objectionable (73) \_\_\_ into their private lives.

After all, a prospective employer would hardly ask a candidate to run a hundred meters, or expect his or her family doctor to provide (74) \_\_\_ medical information. Quite apart from this problem, can such tests predict whether a person is likely to be a (75) \_\_\_ employee or a values colleague?

**Read the following passage and indicate the correct answer to each of the following questions**

Collecting maps can be an enjoyable hobby for antiquarian booksellers, a captivating interest for cartographers, a **lucrative** vocation for astute dealers, and an inspirational part of the occupational functioning of map catalogers, archivists, and historians. Among recognized collectibles, maps are relatively rarer than stamps, but they have had their **avid** enthusiasts and admirers ever since copies were made by hand only for affluent, the commanding officer, and the ship captain.

Whether the interest is business-related or amateur, the **economic means** abundant or slim, a collection needs a theme, be it associated with contemporary changes in cartographic representation or geographic knowledge, or a more accessible goal centered on a particular mapmaker, technique, or type of subject matter. Collectors should not overlook topical maps issued predominantly or exclusively after World War II, such as navigational charts, industrial compound road layouts, or aerial projections. Potential collectors ought not to disregard two **superficially prosaic**, yet important themes: maps of travel routes for family trips, and maps that, for aesthetic reasons, they personally find intriguing or simply attractive. In the first case, like the box with old family photos, the collection will give the travelers the opportunity to reminisce and relive the journey.

In most cases, photocopies are worthy alternatives to originals. For example, historical society collections customarily include the high quality facsimiles needed to make a collection as comprehensive and practical as possible, supplementing the contributions made by well-to-do donors and benefactors. If not **predisposed** to wait patiently, and possibly ineffectually, for a lucky find, collectors may choose to sift through dealer stock, peruse through advertisements in local, regional, or national periodicals, and solicit the assistance of the U.S. Library of Congress and private agencies. Government and public agencies, companies, and trade associations can advise the collector about maps currently in circulation and pending sales of dated reproductions, editions, and prints.

76. What is the main idea of the passage?

- A. Why hobbyists always flaunt their map collections.
- B. **How maps can be collected by professionals and enthusiasts.**
- C. How to assure an interrupted flow of collectibles.
- D. What cartographers advocate as a worthy undertaking.

77. In paragraph 1, the word **lucrative** is closest in meaning to

- A. instructive
- B. insensitive
- C. **profitable**
- D. profuse

78. According to the passage, map collecting as a hobby is

- A. not deserving of the time and resources
- B. **not as conventional as collecting stamps**
- C. as eccentric as collecting dolls
- D. conformist in the best sense of the word.

79. In paragraph 1, the word **avid** is closest in meaning to

- A. **keen**
- B. humorous
- C. devoted
- D. supportive

80. It can be inferred from the passage that, at a time when maps were accessible to the upper socioeconomic classes, they appealed also to a fair number of

- A. professional copiers
- B. **ardent devotees**
- C. buried-treasure hunters
- D. obscure amateur dealers

81. In paragraph 2, the phrase "economic means" is closest in meaning to

- A. economic maps
- B. fiscal responsibility
- C. **available funds**
- D. capital investment

82. The author of the passage mentions all of the following as sources of procuring maps EXCEPT

- A. fellow collectors
- B. map vendors
- C. personal archives
- D. publishers
