Global warming is a serious problem that affects the whole world. It is caused by the increase of greenhouse gases in the atmosphere. These gases trap heat from the sun and make the Earth hotter. The effects of global warming are dangerous. The polar ice caps are melting, which causes sea levels to rise. This threatens lowlying countries and coastal cities. Extreme weather events like hurricanes, floods, and droughts are happening more frequently. To stop global warming, we need to reduce our carbon footprint. We can do this by using renewable energy sources like solar and wind power. We should also plant more trees because they absorb carbon dioxide. Every small action counts, so let's protect our planet before it's too late.
