Read the following passage and mark the letter A, B, C or D on your answer sheet to indicate the correct answer to each of the following questions from 31 to 36.

Public transport is very important in big cities. It allows a lot of people to move around easily. The term “public transport” covers many different types of vehicles, but most commonly refers to buses and trains.

Good transportation has lots of benefits for people, businesses, and the environment. For example, good transport can help people go to work every day. It can also reduce the time people go to work and the cost of living. Public transport is especially important for people with low income. Public transport also helps us keep our community greener and healthier. It can improve our health and reduce healthcare costs. By providing an alternative means of travel, public transport can also have an important role in reducing carbon emissions.

Question 28. Why does public transport play an important role in reducing carbon emissions?

- A. It helps reduce pollution
- B. It allows a lot of people to move
- C. It is not significant at all
- D. It provides an alternative means of travel
