-----TAPESCRIPT-----

Listen 1: Education is one of the most important things in our lives. Don't you agree? It can make the difference between success and failure. An education can bring us knowledge and make us rich. In rich countries, people are lucky to have good schools. Children start learning from a very young age. They can further their education and go to higher education or university. In Japan, there are even private schools for babies to learn English. It's a shame that in many rich countries, many children don't want to learn. Perhaps schools need to find better ways to teach so children want to learn. It's sad that in many parts of the world, children want to learn but can't. Make sure you never stop learning. Education is the key to a better future.

Listen 2: Most kids say they don't like school. They say their subjects are boring or there's too much homework. In fact, school is one of the best times of a person's life. Think about it. The hours are short – usually just six hours a day. You have the opportunity to learn lots of really useful stuff. You get to do science experiments, learn a musical instrument and play sports. On top of that, you get loads of holidays. Oh, I nearly forgot, you also get to see and play with your friends five days a week. What is there not to like? OK, school lunches are not the best in the world but you can bring your own lunch. And yes, exams are stressful, but if you study, you'll do well in them. I'd love to go back to school. If I had another chance, I'd try my best in every subject.
