pollution that it may hang in the	e air like dirty fog. Air pollutio	on threatens the health of the pe	ople who live in cities. City		
wastes cause water pollution when they are poured into the waterways. These wastes kill fish and make some areas unfit					
for swimming. In addition, many large cities have difficulties in disposing of their garbage. The amount of garbage grows					
each year, but places to put <u>it</u> are quickly filling up. Citizens, governments, industries, scientists, and business people must					
work together in <u>different</u> ways to gradually reduce pollution. For example, most cities have introduced recycling
