A. a-d-b-c-e

B. a-b-d-e-c

C. a-d-c-b-e

D. d-a-b-c-e

Mark the letter A, B, C, or D on your answer sheet to indicate the correct option that best fits each of the numbered blanks.

Imagine your shock when you visit San Francisco for the first time and you have to walk under an ugly freeway to get to the bay. It isn't what you expected. However, one improvement (18)_____. For three decades until the early 1990s, the Embarcadero freeway was one of the least attractive parts of San Francisco. The two-level freeway completely blocked the view of the bay. In addition, pedestrians had to walk underneath this 150,000-ton cement structure (19)_____. It was dirty and dark, with a lot of noise from the cars rushing overhead.

In 1989, part of the freeway was destroyed by an earthquake. Two years later, city authorities decided to take the whole thing down and renovate the area. (20)_____. People are able to walk or jog along the Embarcadero or just enjoy views of the Bay Bridge, the water, the hills, and the neighboring cities. (21)_____, one of San Francisco's most important buildings. The Ferry Building was closed for decades, but since the renovation, it has been open and now houses great shops and restaurants. The once ugly Embarcadero has become a place that residents and tourists want to visit.

The demolition of the Embarcadero Freeway has significantly enhanced the waterfront, transforming it into an appealing and accessible space for both residents and visitors of San Francisco. This redevelopment has been so successful that the existence of the former freeway (22)_____. Looking forward, what additional urban enhancements could further elevate San Francisco as a desirable and aesthetically pleasing destination for both living and tourism?

(Adapted from *Pathways*)

Question 18:

- A.** has made the city a more beautiful place for tearing down the Embarcadero freeway
- B.** which has made the city a more beautiful place tearing down the Embarcadero freeway
- C.** that has made the city a more beautiful place is tearing down the Embarcadero freeway
- D.** making the city a more beautiful place for tearing down the Embarcadero freeway

Question 19:

- A.** in order to get from downtown to the bay
- B.** in terms of getting from downtown to the bay
- C.** regardless of getting from downtown on the bay
- D.** by getting from downtown on the bay

Question 20:

- A.** One way that this has helped is it gave people access to the bay
- B.** One way that has helped give people access to the bay
- C.** One way has helped is gave people access to the bay
- D.** One way helping is that it gave people access to the bay

Question 21:

- A.** Tearing down the freeway, residents and tourists has been allowed to see the beautiful Ferry Building
- B.** Residents and tourists torn down the freeway and allowed seeing the beautiful Ferry Building
- C.** Tearing down the freeway has allowed also residents and tourists to see the beautiful Ferry Building
- D.** Tearing down the freeway has also allowed residents and tourists to see the beautiful Ferry Building

Question 22:

- A.** remains a vivid memory for most people.

- B. is frequently recalled by the majority of people.
- C. has faded from the collective memory of most people
- D. is still a prominent part of public memory

Read the following passage about career options and mark the letter A, B, C, or D on your answer sheet to indicate the best answer to each of the following questions.

Exploring career options is an important step on the road to adulthood. As you enter high school, you will be faced with choices in which classes you take. The classes you take in high school affect the choices you have and the careers you can consider. Having an idea of where you want to be in the next five to ten years will get you started in the right direction.

Comparing classes you enjoy with those you don't can be a good guide to exploring career paths. What may be an obvious example is someone who excels in math and science looking at a career in those fields. What may not be so obvious is to explore the subjects within a class that someone thrives on while not particularly enjoying the class as a whole. For example, you may be bored by the dates or political aspects of history, but completely intrigued by the personalities behind those events, leading to careers ranging anywhere from psychology to journalism.

Considering what you want to do and what you're prepared to do is a major factor in excluding inappropriate career choices. Someone with stage-fright, for example, will have some challenges to explore before seriously going on to become an actress or musician.

Once you begin to favour a career path, volunteering and other extracurricular activities can give you a taste for that career while giving you valuable hands-on experience. For example, working at a pet store or volunteering at a local animal shelter gives you first-hand experience of working with animals. Researching careers online and talking to people who work in that field can also help you make the transition toward adulthood. School guidance teachers are also a valuable resource for exploring careers, are career aptitude tests offered by high schools and colleges.

(Adapted from *eslprintables*)

Question 23: According to the passage, which is NOT mentioned as a resource for career exploration?

- A. School guidance counselors.
- B. Volunteering opportunities.
- C. Conversations with professionals.
- D. Paid internships at companies.

Question 24: The word excels in paragraph 2 could best be replaced by _____.

- A. struggles
- B. succeeds
- C. fails
- D. ignores

Question 25: What does the word those in paragraph 2 refer to?

- A. careers
- B. fields
- C. years
- D. classes

Question 26: The word valuable in paragraph 4 is OPPOSITE in meaning to _____.

- A. worthless
- B. helpful
- C. meaningful
- D. significant

Question 27: Which of the following best paraphrases the underlined sentence in paragraph 2?

- A. Even if you dislike a class overall, identifying parts of it that interest you can guide career choices.
- B. Disliking an entire subject means it has no relevance to your future career path.
- C. Classes you enjoy completely are the best indicators of your future profession.
- D. Avoiding subjects that don't excite you is the key to finding your ideal career path.

Question 28: Which of the following is TRUE according to the passage?

- A. High school classes can influence the career options students consider in the future.
- B. Avoiding subjects you find uninteresting is a good way to eliminate unsuitable career paths.
- C. Volunteering at a local animal shelter guarantees success in a career related to animals.
- D. Researching careers online is the only reliable method to explore potential career paths.

Question 29: In which paragraph does the author discuss the importance of exploring specific subjects within a class?

- A. Paragraph 1
- B. Paragraph 2
- C. Paragraph 3
- D. Paragraph 4

Question 30: In which paragraph does the author mention volunteering as a way to gain career experience?

- A. Paragraph 1
- B. Paragraph 2
- C. Paragraph 3
- D. Paragraph 4

Read the following passage about personality and mark the letter A, B, C, or D on your answer sheet to indicate the best answer to each of the following questions

[I] The age-old question of whether personality is shaped by nature or nurture has intrigued scientists and philosophers alike. [II] Ancient Greek thinkers, such as Hippocrates, proposed that personality was influenced by bodily fluids or “humors.” [III] Though influential for centuries, this theory was eventually **dismissed** as science advanced, leading to new perspectives on what shapes human personality. [IV]

In the 19th century, phrenology emerged, claiming that the shape of a person’s skull reflected their personality traits and even criminal tendencies. While this pseudoscience was later debunked, it encouraged further exploration into biological influences. By the 20th century, research into genetics provided compelling evidence of nature’s role. Thousands of genes are now known to influence traits like extroversion, agreeableness, and emotional stability. Even a simple trait like skin color involves over 100 genes, highlighting the complexity of biological contributions to personality and how **they** collectively impact who we are.

Nurture plays an equally significant role. Psychologist B.F. Skinner argued that behavior is shaped entirely by environment and experiences, famously stating, “Give me a child, and I’ll shape him into anything.” The Stanford Prison Experiment further demonstrated how dramatically environment can alter behavior, with participants adopting aggressive or submissive roles based purely on their assigned positions. Such cases show how life experiences and social surroundings **profoundly** impact personality development, making it clear that nurture cannot be ignored.

Studies on identical twins provide a fascinating intersection of these perspectives. Twins raised apart often display similar personality traits, reinforcing the influence of genetics. However, differences shaped by unique life experiences illustrate the undeniable role of nurture. This interplay between nature and nurture suggests that personality results from their combined influence rather than one working independently.

Modern science suggests that personality is shaped by a complex interplay between nature and nurture. While genes provide the foundation, the environment molds and refines them over time. Understanding this intricate balance not only helps us appreciate the diversity of human personality but also deepens our knowledge of what makes us truly unique.

Question 31: Where in paragraph 1 does the following sentence best fit?

For example, black bile was thought to cause melancholy, while blood was associated with courage and optimism.

- A. [I] B. [II] C. [III] D. [IV]

Question 32: The word **dismissed** in paragraph 3 is **OPPOSITE** in meaning to _____.

- A. ignored B. rejected C. accepted D. emphasized

Question 33: The word **they** in paragraph 2 refers to _____.

- A. genes B. traits C. contributions D. influences

Question 34: Which of the following is NOT mentioned in the passage as a factor influencing personality?

- A. Genes B. Environment C. Phrenology D. Hormonal imbalances

Question 35: The word **profoundly** in paragraph 1 could best be replaced by _____.

- A. slightly B. deeply C. carefully D. temporarily

Question 36: Which of the following is **TRUE** according to the passage?

A. Phrenology has been discredited, but its principles continue to influence modern approaches to personality research.

B. Behaviorists suggest that environmental influences are the sole determinant of personality traits, with no input from genetic factors.

C. The Stanford Prison Experiment provides evidence of how situational factors and assigned roles can lead to drastic changes in human behavior.

D. Identical twins raised in separate environments demonstrate consistent traits, proving that genetics is the most important factor in personality development.

Question 37: Which of the following best summarizes paragraph 3?

A. External circumstances and unique experiences significantly influence personality alongside other factors.

B. The role of environmental factors in shaping personality is minor compared to that of genetic inheritance.

C. Individual behavior is largely molded by specific social environments and assigned roles in society.

D. Most psychologists argue that inherited traits are more influential than experiences in defining personality.

Question 38: Which of the following best paraphrases the underlined sentence in the final paragraph?

A. Understanding the role of genes and environment can help us fully explain personality.

B. Genes and environment interact to shape personality, highlighting human uniqueness.

C. Human behavior is fully determined by the environment, as nature plays a minor role.

D. The complexity of personality makes it impossible to study scientifically.

Question 39: Which of the following can be inferred from the passage?

A. Genetic studies on twins show that similar traits often appear even when they are raised in different settings.

B. Ancient theories like Hippocrates' humors remain relevant to personality studies today.

C. Environmental influences are less impactful than genetic factors in shaping personality traits.

D. Science has completely resolved the question of how genes and environment shape personality.

Question 40: Which of the following best summarizes the passage?

A. Personality is shaped by both genetic and environmental factors, with their combined influence being significant.

B. Genetic contributions to personality are more substantial than environmental factors, making nature the primary determinant.

C. Early theories, like Hippocrates' humors, have been dismissed but still paved the way for modern personality research.

D. Environmental factors play a greater role in personality development, making nurture more important than genetics overall.
