Write your answers in the answer sheet given. (1.0 point)

You don't have to be Superman to fly in space. Many men and women from many different countries have done it. For example, the European Space Agency (ESA) now has 14 astronauts from 8 different countries.

The first thing is this – you need to be sure it's the job you really want to do. It requires lots of hard work and several years of study at universities before astronaut training even begins. Most people start between 27 and 37 years of age. Many astronauts also train to become pilots first.

Astronauts come from all over Europe and the world, and it's important that they can speak the same languages. They have to speak English, and they're given Russian lessons. Some also learn another language, for example Japanese, as a number of astronauts are Japanese speakers.

If you're still at school and you'd like to be an astronaut when you're older, it's not too early to start developing the skills you'll need. Playing video games is a great thing to do, as it helps you to think quickly and clearly. This is what you'll need to do when you travel in space.

Another good thing to do is sports, especially team sports. They make you fit, of course, but more importantly, they help you learn how to do things together with your colleagues.

9. What is the best title for this article?

- A. What is the European Space Agency?
- B. Is playing sports good for our health?**
- C. Would you like to be an astronaut?

10. How many astronauts are there in the European Space Agency?

- A. 8
- B. 14**
- C. 27

11. The word "it" in paragraph 4 refers to

- A. being an astronaut
- B. playing video games**
- C. travelling in space

12. Which of the following is NOT true according to the passage?

- A. It's important to know that being an astronaut is right for you.**
- B. ESA astronauts can speak English, Russian and Japanese after training.
- C. Team sports can be useful if you want to become an astronaut.
