9: A. would B. to C. had D. might
10: A. keep B. line C. show D. set
11: A. cost of living B. lifestyle C. lifeline D. livelihood

Read the following passage and choose the correct answer to each of the questions from 12 to 18.

The food we eat seems to have profound effects on our health. Although science has made enormous steps in making food more **fit** to eat, it has, at the same time, made many foods unfit to eat. Some research has shown that perhaps eighty percent of all human illnesses are related to diet and forty percent of cancer is related to the diet as well., especially cancer of the colon. People of different cultures are more **prone** to contract certain illnesses because of the characteristic foods they consume.

That food is related to illness is not a new discovery. In 1945, government researchers realized that nitrates and nitrites (commonly used to preserve color in meat) as well as other food additives caused cancer. Yet, **these carcinogenic additives** remain in our food, and it becomes more difficult all the time to know which ingredients on the packaging labels of processed food are helpful or harmful.

The additives that we eat are not all so direct. Farmers often give penicillin to cattle and poultry, and because of this, penicillin has been found in the milk of treated cows.

Sometimes similar drugs are administered to animals not for medicinal purposes, but for financial reasons. The farmers are simply trying to fatten the animals in order to obtain a higher price on the market. Although the Food and Drug Administration (FDA) has tried repeatedly to control these procedures, the practices continue.

A healthy diet is directly related to good health. Often we are unaware of detrimental substances we ingest. Sometimes well-meaning farmers or others who do not realize the consequences add these substances to food without our knowledge.

- 12: What is the best title for this passage?
A. Harmful and Harmless Substances in Food B. Improving Health through a Natural Diet.
C. The Food You Eat Can Affect Your Health D. Avoiding Injurious Substances in Food.
- 13: The word "**carcinogenic**" is closest in meaning to _____.

66: (A) Those of you (B) who signed up (C) for Dr Daniel's anthropology class should get (D) their books as soon as possible.

Read the following passage and choose the correct answer to each of the questions

According to airline industry statistics, almost 90 percent of airline accidents are survivable or partially survivable. But passengers can increase their chances of survival by learning and following certain tips. Experts say that you should read and listen to safety instructions before takeoff and ask questions if you have uncertainties. You should fasten your seat belt low on your hips and as tightly as possible. Of course, you should also know how the release mechanism of your belt operates. During takeoff and landings you are advised to keep your feet flat on the floor. Before takeoff you should locate the nearest exit and an alternative exit and count the rows of seat between you and the exits so that you can find them in the dark if necessary

In the event that you are forewarned of the possible accident, you should put your hands on your ankles and keep your head down until the plane come to complete stop. If smoke is present in the cabin, you should keep your head low and cover your face with napkins, towels, or clothing. If possible, wet these for added protection against smoke inhalation. To **evacuate** as quickly as possible, follow crew command and do not take personal belongings with you. Do not jump on escape slides before they are fully **inflated** and when you jump, do so with your arms and legs extended in front of you. When you get to the ground, you should move away from the plane as quickly as possible, and never smoke near the wreckage.

67: Travelers are urged by experts to read and listen to safety instructions ?

- A. in an emergency
- B. if smoke is in the cabin
- C. before locating the exits
- D. before take off**

68: Airline passenger are to do all of the following **EXCEPT**

- A locate the nearest exist
- B fasten their seat belt before take off
- C ask questions about safety
- D carry personal belongings in an emergency**

69: What is the main topic of the passage?

- A. guidelines for increasing aircraft passengers survival.**
- B. procedures for evacuating aircraft
- C. safety instructions in air travel
- D. airline industry accident statistics

70: According to the passage, which exits should an airline passenger locate before take off

- A. the nearest one
- B. the ones that can be found in the dark
- C. the ones with counted rows of seats between them
- D. the two closest to the passenger's seat**

71: The word "**inflated**" in the second paragraph is closes in meaning to _____.

- A. expanded
