Scientists estimate that at the beginning of 20th century 100,000 tigers flourished throughout Asia, from eastern Russia and Korea through eastern and southern China, Southeast Asia, the Indian subcontinent, and into Pakistan. At the start of the 21st century only 5,000 to 7,000 tigers lived (1).....

Cambodia, China, India, Laos, Malaysia, Myanmar, Nepal, North Korea, Russia, Sumatra, Thailand, and Vietnam. Tigers are now extinct in Bali, Java, and around the Caspian Sea, and nearly so in China and North Korea. Less than 20 percent of today's tiger habitat is located (2)....., which means that the majority of the areas where tigers live could be lost to other uses, such as agriculture or urbanization.

Tigers are territorial- they live alone (3).....other tigers. The ideal tiger territory is a large forested area with rich vegetation for cover, plentiful water to drink and cool off in, and abundant deer, swine, and other large mammals to eat. With these three essential, tigers can thrive (4)....., tropical rain forests in Sumatra and Southeast Asia; cool oak and pine forest in the Amur River Valley in far eastern Russia; tall grass jungles (5)in Bangladesh; and mountain slopes in Bhutan.

- A. in no more than a hundred species left
- B. in the wild in just 14 Asian countries: Bangladesh, Bhutan.
- C. in wildlife preserves which are built
- D. in large areas that they defend from
- E. in national parks or other protected areas
- F. in India and Nepal; coastal mangrove forests
- G. in diverse habitats and climates including
- H. in the suburbs or on the outskirts of the city

II. Read the passage and answer the questions.

According to airline industry statistics, almost 90 percent of airline accidents are survivable or partially survivable. But passengers can increase their chances of survival by learning and following certain tips. Experts say that you should read and listen before take off and ask questions if you have uncertainties. You should fasten your seat belt low on your hips and as tightly as possible. Of course, you should also know how the real mechanism of your belt operates. During takeoffs and landings, you are advised to keep your feet flat on the floor. Before takeoff you should locate the nearest exit and an alternative exit and count the rows of seats between you and the exits so that you can find them in the dark if necessary.

In the event that you are forewarned of a possible accident, you should put your hands on your ankles and keep your head down until your plane comes to complete stop. If smoke is present in the cabin, you should keep your head low and cover your face with napkins, towels or clothing. If possible, wet these for added protection

against smoke inhalation. To evacuate as quickly as possible, follow crew commands and do not take personal belongings with you. Do not jump on escape slides before they are in front of you. When you get to the ground, you should move away from the plane as quickly as possible, and never smoke near the wreckage.

1. What is the main topic of the passage?
.....2.
- According to experts, when are travelers urged to read and listen to safety instructions?
.....3.
- Which exits should an airline passenger locate before takeoff?
.....4.
- Find out a word which is synonym with the word “evacuate” in the passage.
.....5.
