A. excite

B. excitement

C. exciting

D. excited

Read the following passage and mark the letter A, B, C, or D on your answer sheet to indicate the best answer to each of the questions from 11 to 16.

In many schools today, students learn science and mathematics in English, even when English is not their first language. This method helps students learn new ideas in these important subjects and improves their English skills at the same time.

Learning science subjects in English has several benefits. First, many science books and articles are written in English. If students know English, they can understand and use these materials easily. Second, when students study science in English, **they** learn important words that help them speak about scientific topics clearly. This can help students who want to study or work in other countries in the future. Also, studying science in English encourages students to work together and discuss ideas clearly.

However, this method can sometimes be difficult. Some students may find science ideas hard to understand because their English skills are **limited**. Teachers may also have problems if their own English is not strong enough. Therefore, schools need to support teachers and students by providing extra training and language help.

In conclusion, learning science and math in English can give students many advantages. With good support from schools and teachers, students can successfully learn both important subjects and language skills for their future.

Question 11: What is the main topic of the passage?

- A. Problems faced by science teachers
- B. Learning English through reading books
- C. Teaching science and math in English
- D. Why English is difficult for students

Question 12: According to the passage, which is NOT a benefit of studying science in English?

- A. Students understand science materials better
