The green building movement, started in the 1970s as a way to	reduce environmental
destruction, is changing the way buildings are constructed. In the early years,	
small minority, and their goals of reducing the environmental impact of buil-	dings were considered
unrealistic. Now, however, the movement is growing, as builders have been ab	le to take advantage of
new technology.	_
Green builders try to make use of recycled materials, which means less	waste in dumps. Also,
they reduce environmental impact by reducing the energy requirements of a b	uilding. One way is to
provide an alternative, non-polluting source of energy. First, with solar panels, it	t is possible to produce
electricity from the rays of the sun. Once installed, they provide energy at	no cost and with no
pollution.	
Another solution is to reduce the amount of energy required in a building	
electricity use noticeably by improving natural lighting and installing low-e	energy light bulbs. To
reduce the amount of fuel needed for heating or cooling, builders also add ins	ulation to the walls so
that the building stays warmer in winter and cooler in summer.	
1. When did the green building movement start?	
2. Were the goals of reducing the environmental impact of buildings considered	
2. Were the goals of reducing the environmental impact of buildings considered	realistic?

The price of holidays can fluctuate a great deal throughout the year, so you can save a lot if you are flexible with your travel dates and avoid peak holiday times. It can be also cheaper if you book well in advance. Before your departure, make sure you get as much information about your destination as you can. Find out if you require any special visas or permits to travel there. Think about spending

money as well. Will you be able to access your own money easily enough or will you need to take cash with you? Think about eating larger lunches and smaller evening meals to help your money go further as lunch is generally cheaper. Make sure that you keep sufficient identification with you at all times. It may also help to email a copy of your passport details to yourself in case it is lost or stolen. Label your suitcases clearly so that **they** can be easily identified as yours. It can be useful to store a copy of your itinerary in a **prominent** place in your suitcase so that the airline will know where to find you if your luggage gets lost. Be sure to pack any medication or other essential items in your hand luggage. If your flight is delayed or your luggage is lost, these can be difficult to obtain in an airport or a foreign country.

1. What is the main idea of the text?		
A. Travel procedures.	B. Travel advice.

The green building movement, started in the 1970s as a way to reduce environmental destruction, is changing the way buildings are constructed. In the early years, green builders were a small minority, and their goals of reducing the environmental impact of buildings were considered unrealistic. Now, however, the movement is growing, as builders have been able to take advantage of new technology.

C. lunches

D. details

Green builders try to make use of recycled materials, which means less waste in dumps. Also, they reduce environmental impact by reducing the energy requirements of a building. One way is to provide an alternative, non-polluting source of energy. First, with solar panels, it is possible to produce electricity from the rays of the sun. Once installed, they provide energy at no cost and with no pollution.

Another solution is to reduce the amount of energy required in a building. It is possible to cut electricity use noticeably by improving natural lighting and installing low-energy light bulbs. To reduce the amount of fuel needed for heating or cooling, builders also add insulation to the walls so that the building stays warmer in winter and cooler in summer.

- **2.** When did the green building movement start?
- In the 1970s

A. visas
