Read the following passage about green energy and mark the letter A, B, C or D on your answer sheet to indicate the best answer to each of the following questions from 1 to 10.		
As we continue to face the impacts of clima increasingly important to the future of our society. To ach	ieve this, the world is shifting tov	wards green energy, and
two particular types of energy at the centre of this movement		
[I] Solar power is all about harnessing the energy	of the sun by using solar panel	s to convert sunlight into
usable electricity. [II] Moreover, solar panels are perfect for installation on a small scale, such as in private homes, since they require very little maintenance and have a long lifespan. [III] However, the ability to generate solar		
power depends on the time of day and weather conditions. [IV] This means that solar panels are often less useful if		
they are installed in places where sunny weather is not typical.		
Wind power involves converting the energy of		ae turbines. Wind power
doesn't produce any greenhouse gases, but it is not ide		
However, wind farms can be installed on a large scale and are able to produce electricity continuously regardless		
of the time of day. This means that if there were more investments in wind power, it could be a viable way to		
provide energy for major cities and even for whole regions		
Wind and solar power contribute significantly to		
fuels, helping us cut down on pollution and slow climate		
helps promote spending on sustainable development by sector.	-	
For now, the biggest challenge of adopting g		
and infrastructure, but the benefits unquestionably of		
crisis and create a better and more sustainable future, gre	en energy sources will undoubte	
Question 1. Where in paragraph 2 does the following sen	tence hest fit?	(Adapted from <i>Bright</i>)
This highly efficient form of energy produces zero		ntly reduce our carbon
footprint.		
footprint. A. [IV] B. [II]	C. [I]	D. [III]
A. [IV] B. [II]	C . [i]	D. [III]
	·	D. [III] D. solar panels
A. [IV] B. [II] Question 2. The word they in paragraph 2 refers to	C. sunny places	D. solar panels
A. [IV] Question 2. The word they in paragraph 2 refers to A. weather conditions B. [II] A. weather conditions B. private homes Question 3. The phrase converting the energy in paragraph A. breaking the energy down B. turning the energy into	C. sunny places raph 3 could best be replaced by C. giving the energy off	D. solar panels
A. [IV] Question 2. The word they in paragraph 2 refers to A. weather conditions B. private homes Question 3. The phrase converting the energy in paragraph A. breaking the energy down B. turning the energy into Question 4. Which of the following best summarizes paragraphs.	C. sunny places raph 3 could best be replaced by C. giving the energy off graph 3?	D. solar panels
A. [IV] Question 2. The word they in paragraph 2 refers to A. weather conditions B. private homes Question 3. The phrase converting the energy in paragraph A. breaking the energy down B. turning the energy into Question 4. Which of the following best summarizes para A. The cost of wind energy makes it impractical for urb	C. sunny places raph 3 could best be replaced by C. giving the energy off graph 3? an areas.	D. solar panels
A. [IV] Question 2. The word they in paragraph 2 refers to A. weather conditions B. private homes Question 3. The phrase converting the energy in paragraph A. breaking the energy down B. turning the energy into Question 4. Which of the following best summarizes para A. The cost of wind energy makes it impractical for urb B. With more investment, wind power can provide relia	C. sunny places raph 3 could best be replaced by C. giving the energy off graph 3? an areas. ble, large-scale electricity.	D. solar panels
A. [IV] Question 2. The word they in paragraph 2 refers to A. weather conditions B. private homes Question 3. The phrase converting the energy in paragraph A. breaking the energy down B. turning the energy into Question 4. Which of the following best summarizes para A. The cost of wind energy makes it impractical for urb B. With more investment, wind power can provide relia C. Private wind turbines are the best solution for reductions.	C. sunny places raph 3 could best be replaced by C. giving the energy off graph 3? an areas. ble, large-scale electricity. ng greenhouse gas emissions.	D. solar panels
A. [IV] Question 2. The word they in paragraph 2 refers to A. weather conditions B. private homes Question 3. The phrase converting the energy in paragraph 4. breaking the energy down B. turning the energy into Question 4. Which of the following best summarizes para A. The cost of wind energy makes it impractical for urb B. With more investment, wind power can provide reliance. Private wind turbines are the best solution for reduction. Wind power produces greenhouse gases and cannot be the condition of the	C. sunny places raph 3 could best be replaced by C. giving the energy off graph 3? an areas. ble, large-scale electricity. ng greenhouse gas emissions. bt supply cities on a large scale.	D. solar panels
A. [IV] Question 2. The word they in paragraph 2 refers to A. weather conditions B. private homes Question 3. The phrase converting the energy in paragraph 4. breaking the energy down B. turning the energy into Question 4. Which of the following best summarizes para A. The cost of wind energy makes it impractical for urb B. With more investment, wind power can provide relia C. Private wind turbines are the best solution for reducing D. Wind power produces greenhouse gases and cannot Question 5. According to paragraph 4, which of the follows	C. sunny places raph 3 could best be replaced by C. giving the energy off graph 3? an areas. ble, large-scale electricity. ng greenhouse gas emissions. bt supply cities on a large scale.	D. solar panels
A. [IV] Question 2. The word they in paragraph 2 refers to A. weather conditions B. private homes Question 3. The phrase converting the energy in paragraph 4. breaking the energy down B. turning the energy into Question 4. Which of the following best summarizes para A. The cost of wind energy makes it impractical for urb B. With more investment, wind power can provide relia C. Private wind turbines are the best solution for reduct D. Wind power produces greenhouse gases and cannot Question 5. According to paragraph 4, which of the follow solar power?	C. sunny places raph 3 could best be replaced by C. giving the energy off graph 3? an areas. ble, large-scale electricity. ng greenhouse gas emissions. bt supply cities on a large scale. ving is NOT a benefit of using gre	D. solar panels D. saving on the energy een energy like wind and
A. [IV] Question 2. The word they in paragraph 2 refers to A. weather conditions B. private homes Question 3. The phrase converting the energy in paragraph 4. breaking the energy down B. turning the energy into Question 4. Which of the following best summarizes para A. The cost of wind energy makes it impractical for urb B. With more investment, wind power can provide relia C. Private wind turbines are the best solution for reduct D. Wind power produces greenhouse gases and cannot Question 5. According to paragraph 4, which of the follow solar power? A. mitigation of climate change	C. sunny places raph 3 could best be replaced by C. giving the energy off graph 3? an areas. ble, large-scale electricity. ng greenhouse gas emissions. bt supply cities on a large scale. ving is NOT a benefit of using gre	D. solar panels D. saving on the energy Deen energy like wind and wels
A. [IV] Question 2. The word they in paragraph 2 refers to A. weather conditions B. private homes Question 3. The phrase converting the energy in paragraph 4. breaking the energy down B. turning the energy into Question 4. Which of the following best summarizes para A. The cost of wind energy makes it impractical for urb B. With more investment, wind power can provide relia C. Private wind turbines are the best solution for reduct D. Wind power produces greenhouse gases and cannot Question 5. According to paragraph 4, which of the follow solar power? A. mitigation of climate change C. green job opportunities	C. sunny places raph 3 could best be replaced by C. giving the energy off graph 3? an areas. ble, large-scale electricity. ng greenhouse gas emissions. bt supply cities on a large scale. ving is NOT a benefit of using gre B. increasing pollution lev D. reduction in fossil fuel	D. solar panels D. saving on the energy Deen energy like wind and wels
A. [IV] Question 2. The word they in paragraph 2 refers to A. weather conditions B. private homes Question 3. The phrase converting the energy in paragraph 4. breaking the energy down B. turning the energy into Question 4. Which of the following best summarizes para A. The cost of wind energy makes it impractical for urb B. With more investment, wind power can provide relia C. Private wind turbines are the best solution for reduci D. Wind power produces greenhouse gases and cannot Question 5. According to paragraph 4, which of the follow solar power? A. mitigation of climate change C. green job opportunities Question 6. The word viable in paragraph 3 is OPPOSITE	C. sunny places raph 3 could best be replaced by C. giving the energy off graph 3? an areas. ble, large-scale electricity. ng greenhouse gas emissions. bt supply cities on a large scale. ving is NOT a benefit of using gre B. increasing pollution lev D. reduction in fossil fuel in meaning to	D. solar panels D. saving on the energy een energy like wind and vels consumption
A. [IV] Question 2. The word they in paragraph 2 refers to A. weather conditions B. private homes Question 3. The phrase converting the energy in paragraph 4. breaking the energy down B. turning the energy into Question 4. Which of the following best summarizes para A. The cost of wind energy makes it impractical for urb B. With more investment, wind power can provide relia C. Private wind turbines are the best solution for reduci D. Wind power produces greenhouse gases and cannot Question 5. According to paragraph 4, which of the follow solar power? A. mitigation of climate change C. green job opportunities Question 6. The word viable in paragraph 3 is OPPOSITE A. effective B. impractical	C. sunny places raph 3 could best be replaced by C. giving the energy off graph 3? an areas. ble, large-scale electricity. ng greenhouse gas emissions. bt supply cities on a large scale. ving is NOT a benefit of using gre B. increasing pollution lev D. reduction in fossil fuel in meaning to C. achievable	D. solar panels D. saving on the energy Deen energy like wind and wels
A. [IV] Question 2. The word they in paragraph 2 refers to A. weather conditions B. private homes Question 3. The phrase converting the energy in paragraph 4. breaking the energy down B. turning the energy into Question 4. Which of the following best summarizes para A. The cost of wind energy makes it impractical for urb B. With more investment, wind power can provide relia C. Private wind turbines are the best solution for reduci D. Wind power produces greenhouse gases and cannot Question 5. According to paragraph 4, which of the follow solar power? A. mitigation of climate change C. green job opportunities Question 6. The word viable in paragraph 3 is OPPOSITE A. effective B. impractical Question 7. Which of the following is TRUE according to the solar power of the following is TRUE according to the solar power of the following is TRUE according to the solar power of the following is TRUE according to the solar power of the following is TRUE according to the solar power of the following is TRUE according to the solar power of the following is TRUE according to the solar power of the following is TRUE according to the solar power of the following is TRUE according to the followin	C. sunny places raph 3 could best be replaced by C. giving the energy off graph 3? an areas. ble, large-scale electricity. ng greenhouse gas emissions. bt supply cities on a large scale. ving is NOT a benefit of using gre B. increasing pollution lev D. reduction in fossil fuel in meaning to C. achievable the passage?	D. solar panels D. saving on the energy een energy like wind and vels consumption
A. [IV] Question 2. The word they in paragraph 2 refers to A. weather conditions B. private homes Question 3. The phrase converting the energy in paragraph 4. breaking the energy down B. turning the energy into Question 4. Which of the following best summarizes para A. The cost of wind energy makes it impractical for urb B. With more investment, wind power can provide relia C. Private wind turbines are the best solution for reduci D. Wind power produces greenhouse gases and cannot Question 5. According to paragraph 4, which of the follow solar power? A. mitigation of climate change C. green job opportunities Question 6. The word viable in paragraph 3 is OPPOSITE A. effective B. impractical Question 7. Which of the following is TRUE according to the costs of installing green energy are minimal and	C. sunny places raph 3 could best be replaced by C. giving the energy off graph 3? an areas. ble, large-scale electricity. ng greenhouse gas emissions. bt supply cities on a large scale. ving is NOT a benefit of using gre B. increasing pollution lev D. reduction in fossil fuel in meaning to C. achievable the passage? I not a challenge.	D. solar panels D. saving on the energy een energy like wind and vels consumption
A. [IV] Question 2. The word they in paragraph 2 refers to A. weather conditions B. private homes Question 3. The phrase converting the energy in paragraph 4. breaking the energy down B. turning the energy into Question 4. Which of the following best summarizes para A. The cost of wind energy makes it impractical for urb B. With more investment, wind power can provide relia C. Private wind turbines are the best solution for reduci D. Wind power produces greenhouse gases and cannot Question 5. According to paragraph 4, which of the follow solar power? A. mitigation of climate change C. green job opportunities Question 6. The word viable in paragraph 3 is OPPOSITE A. effective B. impractical Question 7. Which of the following is TRUE according to the solar power of the following is TRUE according to the solar power of the following is TRUE according to the solar power of the following is TRUE according to the solar power of the following is TRUE according to the solar power of the following is TRUE according to the solar power of the following is TRUE according to the solar power of the following is TRUE according to the solar power of the following is TRUE according to the followin	C. sunny places raph 3 could best be replaced by C. giving the energy off graph 3? an areas. ble, large-scale electricity. ng greenhouse gas emissions. bt supply cities on a large scale. ving is NOT a benefit of using gre B. increasing pollution lev D. reduction in fossil fuel in meaning to C. achievable the passage? I not a challenge. night.	D. solar panels D. saving on the energy een energy like wind and vels consumption
A. [IV] Question 2. The word they in paragraph 2 refers to A. weather conditions B. private homes Question 3. The phrase converting the energy in paragraph 4. breaking the energy down B. turning the energy into Question 4. Which of the following best summarizes para A. The cost of wind energy makes it impractical for urb B. With more investment, wind power can provide relia C. Private wind turbines are the best solution for reduce D. Wind power produces greenhouse gases and cannot Question 5. According to paragraph 4, which of the follow solar power? A. mitigation of climate change C. green job opportunities Question 6. The word viable in paragraph 3 is OPPOSITIA. effective B. impractical Question 7. Which of the following is TRUE according to the A. The costs of installing green energy are minimal and B. Solar power can be generated at any time of day or	C. sunny places raph 3 could best be replaced by C. giving the energy off graph 3? an areas. ble, large-scale electricity. ng greenhouse gas emissions. bt supply cities on a large scale. ving is NOT a benefit of using gre B. increasing pollution lev D. reduction in fossil fuel in meaning to C. achievable the passage? I not a challenge. night. e option for home installations.	D. solar panels D. saving on the energy een energy like wind and vels consumption
A. [IV] Question 2. The word they in paragraph 2 refers to A. weather conditions B. private homes Question 3. The phrase converting the energy in paragraph 4. breaking the energy down B. turning the energy into Question 4. Which of the following best summarizes para A. The cost of wind energy makes it impractical for urb B. With more investment, wind power can provide relia C. Private wind turbines are the best solution for reduce D. Wind power produces greenhouse gases and cannot Question 5. According to paragraph 4, which of the follow solar power? A. mitigation of climate change C. green job opportunities Question 6. The word viable in paragraph 3 is OPPOSITIA. effective B. impractical Question 7. Which of the following is TRUE according to a factor of the following is TRUE according to a factor of the following are minimal and B. Solar power can be generated at any time of day or C. Solar panels are a long-lasting and low-maintenance D. Wind power is more suitable for private homes than Question 8. Which of the following best paraphrases the content of the paragraph and Question 8. Which of the following best paraphrases the content of the paragraphrases the content of the paragraphrase the paragraphras	C. sunny places raph 3 could best be replaced by C. giving the energy off graph 3? an areas. ble, large-scale electricity. ng greenhouse gas emissions. bt supply cities on a large scale. ving is NOT a benefit of using gre B. increasing pollution lev D. reduction in fossil fuel in meaning to C. achievable the passage? I not a challenge. night. e option for home installations. solar power. underlined sentence in paragraph	D. solar panels D. saving on the energy een energy like wind and rels consumption D. sustainable
A. [IV] Question 2. The word they in paragraph 2 refers to A. weather conditions B. private homes Question 3. The phrase converting the energy in paragraph 4. breaking the energy down B. turning the energy into Question 4. Which of the following best summarizes para A. The cost of wind energy makes it impractical for urb B. With more investment, wind power can provide relia C. Private wind turbines are the best solution for reducing D. Wind power produces greenhouse gases and cannot Question 5. According to paragraph 4, which of the follow solar power? A. mitigation of climate change C. green job opportunities Question 6. The word viable in paragraph 3 is OPPOSITIA. effective B. impractical Question 7. Which of the following is TRUE according to a factor of the following is TRUE according to a factor of the following is TRUE according to a factor of the following is TRUE according to a factor of the following is TRUE according to a factor of the following is TRUE according to a factor of the following is TRUE according to a factor of the following is TRUE according to a factor of the following is TRUE according to a factor of the following is TRUE according to a factor of the following is the factor of the fac	C. sunny places raph 3 could best be replaced by C. giving the energy off graph 3? an areas. ble, large-scale electricity. ng greenhouse gas emissions. bt supply cities on a large scale. ving is NOT a benefit of using gre B. increasing pollution lev D. reduction in fossil fuel in meaning to C. achievable the passage? I not a challenge. night. c option for home installations. solar power. underlined sentence in paragraph if to be the key option.	D. solar panels D. saving on the energy een energy like wind and rels consumption D. sustainable
A. [IV] Question 2. The word they in paragraph 2 refers to A. weather conditions B. private homes Question 3. The phrase converting the energy in paragraph 4. breaking the energy down B. turning the energy into Question 4. Which of the following best summarizes para A. The cost of wind energy makes it impractical for urb B. With more investment, wind power can provide relia C. Private wind turbines are the best solution for reducing D. Wind power produces greenhouse gases and cannot Question 5. According to paragraph 4, which of the follow solar power? A. mitigation of climate change C. green job opportunities Question 6. The word viable in paragraph 3 is OPPOSITIA. effective B. impractical Question 7. Which of the following is TRUE according to a B. Solar power can be generated at any time of day or C. Solar panels are a long-lasting and low-maintenance D. Wind power is more suitable for private homes than Question 8. Which of the following best paraphrases the can be designed as a completely cost-effective becomes completely cost-effective because the complete cost-effective becomes completely cost-effective because the complete cost-effective becomes completely cost-effective because the complete cost-effective because the cost-effective because the complete cost-effective because the c	C. sunny places raph 3 could best be replaced by C. giving the energy off graph 3? an areas. ble, large-scale electricity. ng greenhouse gas emissions. bt supply cities on a large scale. ving is NOT a benefit of using gre B. increasing pollution lev D. reduction in fossil fuel in meaning to C. achievable the passage? I not a challenge. night. c option for home installations. solar power. underlined sentence in paragraph it to be the key option. ective will it replace fossil fuels.	D. solar panels D. saving on the energy een energy like wind and rels consumption D. sustainable
A. [IV] Question 2. The word they in paragraph 2 refers to A. weather conditions B. private homes Question 3. The phrase converting the energy in paragraph 4. breaking the energy down B. turning the energy into Question 4. Which of the following best summarizes para A. The cost of wind energy makes it impractical for urb B. With more investment, wind power can provide relia C. Private wind turbines are the best solution for reducing D. Wind power produces greenhouse gases and cannot Question 5. According to paragraph 4, which of the follow solar power? A. mitigation of climate change C. green job opportunities Question 6. The word viable in paragraph 3 is OPPOSITIA. effective B. impractical Question 7. Which of the following is TRUE according to a continuation of the power can be generated at any time of day or C. Solar panels are a long-lasting and low-maintenance D. Wind power is more suitable for private homes than Question 8. Which of the following best paraphrases the continuation of the costs of green energy are too great for B. Not until green energy becomes completely cost-effice. Were the costs of green energy lower, its adoption of the costs of green energy lower, its adoption of the costs of green energy lower, its adoption of the costs of green energy lower, its adoption of the costs of green energy lower, its adoption of the costs of green energy lower, its adoption of the costs of green energy lower, its adoption of the costs of green energy lower, its adoption of the costs of green energy lower, its adoption of the costs of green energy lower, its adoption of the costs of green energy lower, its adoption of the costs of green energy lower, its adoption of the costs of green energy lower, its adoption of the costs of green energy lower, its adoption of the costs of green energy lower, its adoption of the costs of green energy lower, its adoption of the costs of green energy lower.	C. sunny places raph 3 could best be replaced by C. giving the energy off graph 3? an areas. ble, large-scale electricity. ng greenhouse gas emissions. bt supply cities on a large scale. ving is NOT a benefit of using gre B. increasing pollution lev D. reduction in fossil fuel in meaning to C. achievable the passage? I not a challenge. night. c option for home installations. solar power. underlined sentence in paragraph it to be the key option. ective will it replace fossil fuels. vould be much easier.	D. solar panels D. saving on the energy een energy like wind and rels consumption D. sustainable
A. [IV] Question 2. The word they in paragraph 2 refers to A. weather conditions B. private homes Question 3. The phrase converting the energy in paragraph 4. breaking the energy down B. turning the energy into Question 4. Which of the following best summarizes para A. The cost of wind energy makes it impractical for urb B. With more investment, wind power can provide relia C. Private wind turbines are the best solution for reducing D. Wind power produces greenhouse gases and cannot Question 5. According to paragraph 4, which of the follow solar power? A. mitigation of climate change C. green job opportunities Question 6. The word viable in paragraph 3 is OPPOSITE A. effective B. impractical Question 7. Which of the following is TRUE according to a paragraph 3. TRUE according to a paragraph 3. Solar power can be generated at any time of day or C. Solar panels are a long-lasting and low-maintenance D. Wind power is more suitable for private homes than Question 8. Which of the following best paraphrases the company of the paragraph of the pa	C. sunny places raph 3 could best be replaced by C. giving the energy off graph 3? an areas. ble, large-scale electricity. ng greenhouse gas emissions. bt supply cities on a large scale. ving is NOT a benefit of using gre B. increasing pollution lev D. reduction in fossil fuel in meaning to C. achievable the passage? I not a challenge. night. e option for home installations. solar power. underlined sentence in paragraph it to be the key option. ective will it replace fossil fuels. vould be much easier. ong-term alternative.	D. solar panels D. saving on the energy een energy like wind and rels consumption D. sustainable
A. [IV] Question 2. The word they in paragraph 2 refers to A. weather conditions B. private homes Question 3. The phrase converting the energy in paragraph 4. breaking the energy down B. turning the energy into Question 4. Which of the following best summarizes para A. The cost of wind energy makes it impractical for urb B. With more investment, wind power can provide relia C. Private wind turbines are the best solution for reducing D. Wind power produces greenhouse gases and cannot Question 5. According to paragraph 4, which of the follow solar power? A. mitigation of climate change C. green job opportunities Question 6. The word viable in paragraph 3 is OPPOSITIA. effective B. impractical Question 7. Which of the following is TRUE according to a continuation of the power can be generated at any time of day or C. Solar panels are a long-lasting and low-maintenance D. Wind power is more suitable for private homes than Question 8. Which of the following best paraphrases the continuation of the costs of green energy are too great for B. Not until green energy becomes completely cost-effice. Were the costs of green energy lower, its adoption of the costs of green energy lower, its adoption of the costs of green energy lower, its adoption of the costs of green energy lower, its adoption of the costs of green energy lower, its adoption of the costs of green energy lower, its adoption of the costs of green energy lower, its adoption of the costs of green energy lower, its adoption of the costs of green energy lower, its adoption of the costs of green energy lower, its adoption of the costs of green energy lower, its adoption of the costs of green energy lower, its adoption of the costs of green energy lower, its adoption of the costs of green energy lower, its adoption of the costs of green energy lower, its adoption of the costs of green energy lower, its adoption of the costs of green energy lower.	C. sunny places raph 3 could best be replaced by C. giving the energy off graph 3? an areas. ble, large-scale electricity. ng greenhouse gas emissions. bt supply cities on a large scale. ving is NOT a benefit of using gre B. increasing pollution lev D. reduction in fossil fuel in meaning to C. achievable the passage? I not a challenge. night. c option for home installations. solar power. underlined sentence in paragraph it to be the key option. ective will it replace fossil fuels. vould be much easier. ong-term alternative. le passage?	D. solar panels D. saving on the energy een energy like wind and rels consumption D. sustainable

Mã đề 123 Trang 1/4

B. Fossil fuels remain the most practical solution for energy production.
C. The financial burden of green energy outweighs its environmental benefits.
D. Solar energy is a more cost-effective alternative to fossil fuels in all cases.

Question 10. Which of the following best summarizes the passage?

- A. Solar and wind power are the only viable solutions to the global energy crisis, as they completely eliminate pollution and greenhouse gases.
- B. While renewable energy helps combat climate change, its effectiveness is limited by weather conditions, maintenance costs, and large-scale implementation challenges.
- C. Despite its environmental benefits, green energy is too expensive and unreliable to be a practical solution for large-scale energy needs.
- D. Green energy, particularly solar and wind power, is key to reducing pollution and combating climate change, though cost and infrastructure remain challenges.

Read the following leaflet and mark the letter A, B, C or D on your answer sheet to indicate the option that best fits each of the numbered blanks from 11 to 16.

CAN YOU HELP SAVE OUR PLANET?

☼The Harm of Burning Waste Burning rubbish and organic waste in open fires severely damages the environment, (11) _____ nearly a third of global black carbon emissions. The soot traps sunlight, releasing heat and contributing to global warming. Ban open waste burning! The Dangers of Solid Fuels at Home Many people still burn coal and wood for heating and cooking, but this releases black carbon and (12) _____ harmful pollutants. The tiny particles of indoor from indoor stoves can enter the human body and cause carbon (13) ___ serious health problems. Research shows that household air (14) _____ kills millions of people every year. 3 Renewable Energy: A Clean Future Renewable energy is clean and free of black carbon and greenhouse gases, so it does not pollute the environment. It can replace fossil fuels (15) convenience and reliability. Fossil fuels are depleting rapidly while renewable energy will never (16) _____. Power the planet with renewable energy! (Adapted from Global Success) Question 11. A. controlling B. measuring C. generating **D.** stabilizing Question 12. A. others **B**. other C. few **D**. another Question 12.A. othersB. absorbedC. releasedQuestion 13.A. heatedB. absorbedC. releasedQuestion 14.A. componentB. currentC. substanceQuestion 15.A. on account ofB. in spite ofC. regardless ofQuestion 16.A. run outB. put outC. light up **D.** reduced **D.** pollution **D.** instead of **D.** burn down Read the following advertisements and mark the letter A, B, C or D on your answer sheet to indicate the option that best fits each of the numbered blanks from 17 to 22. LANGUAGE EXCHANGE PROGRAM Join the International Language Exchange Program and practice a new language with native speakers from across the globe! This program is excellent (17) _____ linguists who aim to enhance their language proficiency through authentic conversations. With both online and in-person meetings, it's an ideal (18) _____ to develop skills and forge new friendships. Participants will be matched with native speakers (19) _____ by our experienced team to ensure compatibility in language learning. Whether you wish (20) _____ Spanish, French, Japanese, or another language, we have a partner for you. All sessions are available at flexible hours, allowing you to easily incorporate them into your schedule. Expand your global network and (21) confidence in speaking a foreign language. Register now and get ready to embark on an (22) _____ language journey with us! (Adapted C. with D. on B. environment I learning language Position 21. A. do B. make Question 22. A. exciting Position P (Adapted from Global Success)

Read the following passage about remote work and mark the letter A, B, C or D on your answer sheet to indicate the best answer to each of the following guestions from 23 to 30.

D. excitingly

Working from home has become increasingly common, providing employees with greater flexibility and control over their work environments. Without the need for long commutes, people have more time for family, personal interests, or simply to rest. A personalized workspace at home can also lead to higher productivity, as individuals can adjust their surroundings to suit their needs. Many companies now support remote work, recognizing its benefits for both employee well-being and business outcomes.

However, working from home does bring certain challenges. For example, while remote work can boost productivity, some people find it hard to stay focused without the structure of an office setting. There's also a risk of

Mã đề 123 Trang 2/4 isolation, as virtual meetings don't always fully replace face-to-face interactions. However, companies are increasingly devising creative strategies to <u>mitigate</u> these drawbacks, using sophisticated collaboration tools and arranging virtual social activities to preserve a sense of team cohesion.

Another difficulty with working from home is the blurred line between work and personal life. With workspaces merged into the home environment, the temptation to check emails or tackle tasks outside of regular hours can lead to an "always-on" mentality. Setting clear schedules and defining specific working hours is essential to ensure a healthy balance.

Looking forward, remote work is likely to remain a popular choice, supported by ever-advancing technology. Many companies are considering hybrid models, allowing employees to split **their** time between home and office. This flexible approach can balance the productivity of remote work with the social and collaborative benefits of in-person interactions. As remote work continues to evolve, it will reshape traditional work culture, requiring adaptation from both businesses and employees.

(Adapted from BreakingNewEnglish) Question 23. Paragraph 2 Read the following passage about social media and mark the letter A, B, C or D on your answer sheet to indicate the option that best fits each of the numbered blanks from 31 to 35. Social media has become very popular. However, it has many risks for teens. This essay will explain the biggest risks of social media and give some ideas on how to avoid them. One of the biggest things teens need to understand is that the things they post are permanent. If they post on social media today, it could affect their life in the future. Teens may post things (31) , and in the future, a company could find these. Many people have lost their jobs because of things they posted years ago, so teens need to be careful what they post now. The second biggest risk for teens is social media addiction. (32) _____. It can affect their ability to communicate with people, and it also causes their grades to go down. Teenagers should limit their time on social media and spend more time interacting with friends in person. The last risk I want to talk about (33) _____. Teens need to understand that they can get malware by downloading bad software and get viruses by clicking a link or visiting a bad website on social media. These slow down the computer and can even destroy important files. (34) In conclusion, we all know that social media is a big part of most teens lives now. It can be interesting and fun, but using it carelessly can also be risky. However, thinking about what they post, spending less time online, and being careful about possible threats, (35) (Adapted from *i-Learn Smart World*) Question 31. **A.** have led to negative outcomes for many professionals B. could harm their reputation later in life **C.** which the consequences might affect their opportunities **D.** that can make them look like bad people A.
