questions from 17 to 18.

numbered blanks from 19 to 24. Good morning. Welcome to our Fun Science Program. This week we have received (19) questions about life on the moon. We have talked to some experts and these are what we have found out. There is no water or air on the moon. It is all silent (20) there is no air. Of course, there will be no music, no sounds. (21) and no lakes. At night, it is very cold. The temperature (22) down to 151°C below zero. But during the day, it rises to 100°C above zero. There are great round holes on the moon. They are called craters. There are more than 30,000 of them. There are also high mountains. The highest mountains on the moon are about 26,000 feet or 8.000 meters. And here is something very (23) for you to know: on the moon, you weigh one sixth of what you weigh on the earth. If you weigh 50 kilos on the moon, you will weigh only a little more than 8 kilos. You will be able to jump very high, even higher than any high jump Olympic champions. You can take very long steps as well. And maybe you won't (24) because one day on the moon lasts two weeks. So, is there life on the moon? I'll leave the question for you to answer yourselves in the group discussion. Question 19: A. other	The holiday in Singapore last week was memorable but didn't go as smoothly as planned. a Upon arriving at the safari park two hours later, it was discovered that it was closed for maintenance. b. The situation began when the decision was made to visit the safari park. c. Excitement about the trip was high, but the moment the hotel was left, it started raining. A. b-ca				
a. Upon arriving at the safari park two hours later, it was discovered that it was closed for maintenance. b. The situation began when the decision was made to visit the safari park. c. Excitement about the trip was high, but the moment the hotel was left, it started raining. A. b-c-a	a. Upon arriving at the safart park two hours later, it was discovered that it was closed for maintenance. b. The situation began when the decision was made to visit the safari park. c. Excitement about the trip was high, but the moment the hotel was left, it started raining. A. b-ca D. b-a-c D. b-a-c C. c-b-a D. b-a-c D. b-a-c B. a-c-b C. c-b-a D. b-a-c C. c-b-a D. b-a-c B. c-ch C. c-b-a D. b-a-c C. c-b-a D. b-a-c D. b-a-c D. The day ended with was asked for directions to another place of interest. B. Initially, this park was considered a must-see for all nature enthusiasts. C. The day ended with a return to the hotel, feeling quite sad and disappointed. D. The visit included a lot of fim while exploring various animal exhibits. Mark the letter A, B, C, or D on your answer sheet to indicate the correct option that best fits each of the numbered blanks from 19 to 24. Good morning. Welcome to our Fun Science Program. This week we have received (19) questions about life on the moon. We have talked to some experts and these are what we have found out. There is no water or air on the moon. It is all silent (20) there is no air. Of course, there will be no music, no sounds. (21) and no lakes. At night, it is very cold. The temperature (22) down to 151°C below zero. The highest mountains on the moon are about 26,000 feet or 8.000 meters. And here is something very (23) for you to know, on the moon, you weigh one sixth of what you weigh on the earth. If you weigh 50 kilos on the moon, you will weigh only a little more than 8 kilos. You will be to jump very high, even higher than any high jump Olympic champions. You can take very long steps as well. And maybe you won't (24) because one day on the moon lasts two weeks. So, is there life on the moon? I'll leave the question for you to answer yourselves in the group discussion. Question 21. A. Other are rivers B. There isn't rivers C. There are no rivers D. There is no rivers Question 22. A. but B. because C. so D. although Question 21. A. There are rivers B. There isn't rivers C. There are no rivers D. There is no rivers Question 23. A. interested B. interesting C. interest D. There is no rivers Question 23. A. interested B. interesting C. interest D. Here is no rivers Question 23. A. interested B. interesting C. interest D. D. every good sleep Mark the letter A, B, C, or D on your answer sheet to indicate the se	A. Then a local resident was asl	ted for directions to another	place of interest.	
D. The visit included a lot of fun while exploring various animal exhibits. Mark the letter A, B, C, or D on your answer sheet to indicate the correct option that best fits each of the numbered blanks from 19 to 24. Good morning. Welcome to our Fun Science Program. This week we have received (19) questions about life on the moon. We have talked to some experts and these are what we have found out. There is no water or air on the moon. It is all silent (20) there is no air. Of course, there will be no music, no sounds. (21) and no lakes. At night, it is very cold. The temperature (22) down to 151°C below zero. But during the day, it rises to 100°C above zero. There are great round holes on the moon. They are called craters. There are more than 30,000 of them. There are also high mountains. The highest mountains on the moon are about 26,000 feet or 8,000 meters. And here is something very (23) for you to know: on the moon, you weigh one sixth of what you weigh on the earth. If you weigh 50 kilos on the moon, you will weigh only a little more than 8 kilos. You will be able to jump very high, even higher than any high jump Olympic champions. You can take very long steps as well. And maybe you won't (24) because one day on the moon lasts two weeks. So, is there life on the moon? I'll leave the question for you to answer yourselves in the group discussion. Question 19: A. other	D. The vist included a lot of fun while exploring various animal exhibits. Mark the letter A, B, C, or D no your answer sheet to indicate the correct option that best fits each of the numbered blanks from 19 to 24. Good morning. Welcome to our Fun Science Program. This week we have received (19) questions about life on the moon. We have talked to some experts and these are what we have found out. There is no water oir on the moon. It is all silent (20) there is no aire of course, there will be no music, no sounds. (21) and no lakes. At night, it is very cold. The temperature (22) down to 151°C below zero. Iames

Neil rang. He can't play tennis with you tomorrow unless you lend him a racket because his is broken and can't be repaired.

- **A.** Nail's racket will be repaired tomorrow.
- C. Neil's tennis racket has been broken.

- **B.** Neil cannot meet James tomorrow.
- D. Neil will lend James a racket tomorrow.

Read the following passage and mark the letter A, B, C, or D on your answer sheet to indicate the correct answer to each of the following questions from 31 to 36.

One of the greatest security <u>threats</u> in the online world is computer hacking. Hackers are people who illegally enter systems. They may alter or delete information, steal private information, or spread viruses that can damage or destroy files. But how exactly can a hacker get into a system to do these things?

Most hackers use information called protocols that are built into computer software. These protocols allow computers to interact with one another. Protocols are sort of like computer police officers. When a computer connects to another system, the protocols check to see if the access is valid. The protocols can also determine how much information can be shared between the two systems. Hackers can manipulate the protocols to get unlimited access to a computer system.

In fact, just the act of entering a computer network is commonly considered passive hacking. Passive hackers get a rush from just being able to access a challenging system like a bank or military network. Another kind of hacker tries to do damage to a system. After hacking into systems, these hackers release viruses or alter, delete, or take information. Known as active hackers, they are the more dangerous of the two.

The easiest way to protect a system is with a good password. Long and unusual passwords are harder for hackers to guess. For even greater security, some online services now use "password-plus" systems. In this case, users first put in a password and then put in a second code that changes after the user <u>accesses</u> the site. Users either have special cards or devices that show them new code to use the next time. Even if a hacker steals the password, they won't have the code. Or if the hacker somehow gets the code, they still don't know the password.

Question 31. What should be the main title of the passage?

A. Hackers and Computer Security B. Funny Things Hackers Do

C. Famous Hackers

D. Good Ways to Stop Hackers

Question 32. The word "threats" in paragraph 1 is CLOSEST in meaning to ______

A. danger B. safety C. solution D. benefit

Question 33. What do hackers do to get into a computer?

A. manipulating its codes

B. replacing security programs

C. making a new password D. spreading viruses

Question 34. Which of the following can NOT be inferred about active hackers?

A. They make use of the hacked information.

B. They deactivate the protocols in computers.

C. They are more warning	ng than passive ones.	D. They take over	the computers systematically	
Question 35. What is th	ne easiest way to protect a syster	n?		
A. Using a long and unus	sual password	B. Avoiding online	services	
C. Sharing passwords		D. Using the same	D. Using the same password everywhere	
Question 36. The word	"assesses" in paragraph 4 is OF	POSITE in meaning to	·	
A. designs	B. forgets	C. ignores	D. invents
