Read the following passage about remote work and mark the letter A, B, C or D on your answer sheet to indicate the best answer to each of the following questions from 16 to 23.

Working from home has become increasingly common, providing employees with greater flexibility and

control over their work environments. Without the need for long commutes, people have more time for family, personal interests, or simply to rest. A personalized workspace at home can also lead to higher productivity, as individuals can **adjust** their surroundings to suit their needs. Many companies now support remote work, recognizing its benefits for both employee well-being and business outcomes.

However, working from home does bring certain challenges. For example, while remote work can boost productivity, some people find it hard to stay focused without the structure of an office setting. There's also a risk of isolation, as virtual meetings don't always fully replace face-to-face interactions. However, companies are increasingly devising creative strategies to **mitigate** these drawbacks, using sophisticated collaboration tools and arranging virtual social activities to preserve a sense of team cohesion.

Another difficulty with working from home is the blurred line between work and personal life. With workspaces merged into the home environment, the temptation to check emails or tackle tasks outside of regular hours can lead to an "always-on" mentality. Setting clear schedules and defining specific working hours is essential to ensure a healthy balance.

Looking forward, remote work is likely to remain a popular choice, supported by ever-advancing technology. Many companies are considering hybrid models, allowing employees to split **their** time between home and office. This flexible approach can balance the productivity of remote work with the social and collaborative benefits of in-person interactions. As remote work continues to evolve, it will reshape traditional work culture, requiring adaptation from both businesses and employees.
