

Growing Better With Time

- Identify parts of a clock
- Show and write time to the hour
- Show and write time to the half hour

Dear Parent,

Successful learning begins in the home. You can help your child get a good head start in school by providing him or her with plenty of practice in early learning skills. The more your child practices, the more likely he or she is to be a confident, successful student.

The Strawberry Shortcake® practice workbooks are designed to help your child learn and master early math and language skills. Strawberry Shortcake and all the beloved Strawberryland characters delight and inspire your child across 32 pages of entertaining, educational activities. The favorite and familiar character friends help make skills practice a time of fun and cheer, so your child can truly enjoy learning.

The **Growing Better with Time** workbook includes activities for:

- Identifying parts of a clock
- Recognizing, writing, and showing time to the hour
- Recognizing, writing, and showing time to the half hour

You can aid your child's learning progress by guiding him or her through the workbook and reviewing completed work. Remember to offer encouragement and to praise both success and effort.

Congratulations on taking an active role your child's educational development.

Sincerely,

Your friends at
Learning Horizons
