Read the following passage about social media and mark the letter A, B, C or D on your answer sheet to indicate the option that best fits each of the numbered blanks from 1 to 5.

Social media has become very popular. However, it has many risks for teens. This essay will explain the biggest risks of social media and give some ideas on how to avoid them.

One of the biggest things teens need to understand is that the things they post are permanent. If they post on social media today, it could affect their life in the future. Teens may post things (1) _____, and in the future, a company could find these. Many people have lost their jobs because of things they posted years ago, so teens need to be careful what they post now.

The second biggest risk for teens is social media addiction. (2) _____. It can affect their ability to communicate with people, and it also causes their grades to go down. Teenagers should limit their time on social media and spend more time interacting with friends in person.

The last risk I want to talk about (3) _____. Teens need to understand that they can get malware by downloading bad software and get viruses by clicking a link or visiting a bad website on social media. These slow down the computer and can even destroy important files. (4) _____.

In conclusion, we all know that social media is a big part of most teens lives now. It can be interesting and fun, but using it carelessly can also be risky. However, thinking about what they post, spending less time online, and being careful about possible threats, (5) _____.

Read the following passage about remote work and mark the letter A, B, C or D on your answer sheet to indicate the best answer to each of the following questions from 17 to 24.

Working from home has become increasingly common, providing employees with greater flexibility and control over their work environments. Without the need for long commutes, people have more time for family, personal interests, or simply to rest. A personalized workspace at home can also lead to higher productivity, as individuals can **adjust** their surroundings to suit their needs. Many companies now support remote work, recognizing its benefits for both employee well-being and business outcomes.

However, working from home does bring certain challenges. For example, while remote work can boost productivity, some people find it hard to stay focused without the structure of an office setting. There's also a risk of isolation, as virtual meetings don't always fully replace face-to-face interactions. However, companies are increasingly devising creative strategies to **mitigate** these drawbacks, using sophisticated collaboration tools and arranging virtual social activities to preserve a sense of team cohesion.

Another difficulty with working from home is the blurred line between work and personal life. With workspaces merged into the home environment, the temptation to check emails or tackle tasks outside of regular hours can lead to an "always-on" mentality. Setting clear schedules and defining specific working hours is essential to ensure a healthy balance.

Looking forward, remote work is likely to remain a popular choice, supported by ever-advancing technology. Many companies are considering hybrid models, allowing employees to split **their** time between home and office. This flexible approach can balance the productivity of remote work with the social and collaborative benefits of in-person interactions. As remote work continues to evolve, it will reshape traditional work culture, requiring adaptation from both businesses and employees.

Read the following passage about green energy and mark the letter A, B, C or D on your answer sheet to indicate the best answer to each of the following questions from 25 to 34.

As we continue to face the impacts of climate change, having a green environment has become increasingly important to the future of our society. To achieve this, the world is shifting towards green energy, and two particular types of energy at the centre of this movement are solar power and wind power.

[I] Solar power is all about harnessing the energy of the sun by using solar panels to convert sunlight into usable electricity. [II] Moreover, solar panels are perfect for installation on a small scale, such as in private homes, since they require very little maintenance and have a long lifespan. [III] However, the ability to generate solar power depends on the time of day and weather conditions. [IV] This means that solar panels are often less useful if **they** are installed in places where sunny weather is not typical.

Wind power involves **converting the energy** of the wind into electricity using large turbines. Wind power doesn't produce any greenhouse gases, but it is not ideal for private use since turbines require consistent care. However, wind farms can be installed on a large scale and are able to produce electricity continuously regardless of the time of day. This means that if there were more investments in wind power, it could be a **viable** way to provide energy for major cities and even for whole regions.

Wind and solar power contribute significantly to a green environment by reducing our reliance on fossil fuels, helping us cut down on pollution and slow climate change. Additionally, using renewable energy sources helps promote spending on sustainable development by creating new career opportunities in the green energy sector.

For now, the biggest challenge of adopting green energy is the costs associated with installation and infrastructure, but the benefits unquestionably outweigh the downsides. If we want to stop the climate crisis and create a better and more sustainable future, green energy sources will undoubtedly be the key.

Question 25. Where in paragraph 2 does the following sentence best fit?

This highly efficient form of energy produces zero emissions, so it can significantly reduce our carbon footprint.

- A. [III] B. [II] C. [I] D. [IV]

Question 26. The word **they** in paragraph 2 refers to _____.
 A. solar panels B. weather conditions C. private homes D. sunny places

Question 27. The phrase **converting the energy** in paragraph 3 could best be replaced by _____.
 A. breaking the energy down B. giving the energy off
 C. turning the energy into D. saving on the energy

Question 28. Which of the following best summarizes paragraph 3?
 A. With more investment, wind power can provide reliable, large-scale electricity.
 B. Wind power produces greenhouse gases and cannot supply cities on a large scale.
 C. The cost of wind energy makes it impractical for urban areas.
 D. Private wind turbines are the best solution for reducing greenhouse gas emissions.

Question 29. According to paragraph 4, which of the following is NOT a benefit of using green energy like wind and solar power?
 A. green job opportunities B. increasing pollution levels
 C. reduction in fossil fuel consumption D. mitigation of climate change

Question 30. The word **viable** in paragraph 3 is OPPOSITE in meaning to _____.
 A. sustainable B. impractical C. achievable D. effective

Question 31. Which of the following is TRUE according to the passage?
 A. Solar power can be generated at any time of day or night.
 B. Solar panels are a long-lasting and low-maintenance option for home installations.
 C. Wind power is more suitable for private homes than solar power.
 D. The costs of installing green energy are minimal and not a challenge.

Question 32. Which of the following best paraphrases the underlined sentence in paragraph 5?
 A. Despite high costs, green energy remains the best long-term alternative.
 B. The disadvantages of green energy are too great for it to be the key option.
 C. Not until green energy becomes completely cost-effective will it replace fossil fuels.
 D. Were the costs of green energy lower, its adoption would be much easier.

Question 33. Which of the following can be inferred from the passage?
 A. Solar energy is a more cost-effective alternative to fossil fuels in all cases.
 B. Fossil fuels remain the most practical solution for energy production.
 C. The shift to renewable energy is essential for achieving long-term sustainability.
 D. The financial burden of green energy outweighs its environmental benefits.

Question 34. Which of the following best summarizes the passage?
 A. While renewable energy helps combat climate change, its effectiveness is limited by weather conditions, maintenance costs, and large-scale implementation challenges.
 B. Solar and wind power are the only viable solutions to the global energy crisis, as they completely eliminate pollution and greenhouse gases.
 C. Green energy, particularly solar and wind power, is key to reducing pollution and combating climate change, though cost and infrastructure remain challenges.
 D. Despite its environmental benefits, green energy is too expensive and unreliable to be a practical solution for large-scale energy needs.
