**Read the following passage about plant respiration and mark the letter A, B, C, or D on your answer sheet to indicate the best answer to each of the following questions from 23 to 30.**

Plants, like all living organisms, undergo respiration, a process by which they convert stored energy into usable energy. During respiration, plants take in oxygen and release carbon dioxide. This process occurs primarily at night when photosynthesis cannot take place. While plants do absorb carbon dioxide during the day for photosynthesis, they release it at night when respiration occurs. Respiration in plants is essential for the growth and development of all plant tissues.

The process of respiration involves the **breakdown** of sugars (glucose) into smaller molecules, releasing energy that the plant can use for various functions, such as growth, repair, and reproduction. This energy is stored in the form of **ATP** (adenosine triphosphate), which is used by plant cells to perform **vital** functions. The process takes place in the mitochondria, the powerhouse of the cell, where oxygen is used to convert glucose into energy.

Unlike animals, plants are able to perform photosynthesis during the day, which helps them generate their own food. However, **even though photosynthesis provides energy for the plant, respiration is still necessary to maintain its cellular functions.** Without respiration, the energy needed for growth and survival would not be available to the plant, limiting its ability to thrive.

In conclusion, plant respiration is a critical process that allows plants to survive, grow, and reproduce. It provides the energy required for essential cellular functions, helping the plant sustain itself and contribute to the ecosystem. The balance between respiration and photosynthesis is vital to the health and longevity of plants, ensuring they continue to play their important role in the environment.

**Question 23.** Which of the following is NOT mentioned as a result of plant respiration?

- A. Oxygen absorption  
 B. Energy release  
 C. Growth and development  
 D. Energy storage

**Question 24.** The word breakdown in paragraph 2 is CLOSEST in meaning to.....

- A. construction  
 B. decomposition  
 C. movement  
 D. production

**Question 25.** In paragraph 2, the word ATP refers to:

- A. A type of sugar  
 B. A cell structure  
 C. A form of stored energy  
 D. A photosynthesis product

**Question 26.** The word "vital" in paragraph 2 could best be replaced by:

- A. Optional  
 B. Harmful  
 C. Essential  
 D. Irrelevant

**Question 27.** Which of the following best paraphrases the underlined sentence in paragraph 3?

- A. Photosynthesis is the only process that provides energy to the plant.  
 B. Respiration is more important than photosynthesis for the plant.  
 C. Photosynthesis alone can maintain the plant's functions.  
 D. Plants need both photosynthesis and respiration to stay alive.

**Question 28.** According to the passage, which of the following is TRUE?

- A. Plants need respiration to grow and survive.  
 B. Respiration only occurs during the day.  
 C. Plants release oxygen during respiration.

D. The mitochondria store glucose for the plant.

**Question 29.** In which paragraph does the writer explain how respiration provides energy for the plant?

- A. Paragraph 1      **B. Paragraph 2**      C. Paragraph 3      D. Paragraph 4

**Question 30.** In which paragraph does the writer emphasize the importance of both respiration and photosynthesis for plants?

- A. Paragraph 1      B. Paragraph 2      **C. Paragraph 3**      D. Paragraph 4

*Read the following passage about traffic safety in Vietnam and mark the letter A, B, C, or D on your answer sheet to indicate the best answer to each of the following questions from 31 to 40.*

#### Traffic Safety in Vietnam

Traffic safety is a significant concern in Vietnam, where the number of vehicles on the road has increased dramatically in recent years. [I] Despite efforts to improve infrastructure and raise awareness about traffic rules, accidents remain a **serious issue**, leading to thousands of injuries and fatalities each year. [II] According to the National Traffic Safety Committee, in 2022 alone, there were over 13,000 traffic accidents, resulting in nearly 7,000 deaths. [III]

Many factors contribute to this alarming situation. Poor road conditions, lack of proper signage, and the behavior of drivers are major contributors to traffic accidents. Additionally, the high number of motorbikes on the roads often leads to congestion and increases the risk of collisions. Many drivers do not wear helmets or follow traffic laws, which further **exacerbates** the problem. However, there are ongoing initiatives aimed at improving traffic safety. The government has implemented stricter regulations regarding helmet use and drunk driving. Public awareness campaigns are also being conducted to educate citizens about safe driving practices. These efforts are crucial in reducing the number of accidents and promoting a culture of safety on the roads.

**Ensuring traffic safety is not only a matter of law enforcement; it is essential for the well-being of all citizens.** By creating safer roads and promoting responsible driving, Vietnam can work towards a future with fewer traffic-related tragedies.

**Question 31:** Which position in paragraph 1 is the most appropriate for the sentence: "Improving traffic safety is vital for the health and safety of all road users."

- A. [I]**      B. [II]      C. [III]      D. [IV]

**Question 32:** The phrase "**serious issue**" in paragraph 1 can be replaced with which word?

- A. Minor problem      **B. Major concern**      C. Simple matter      D. Easy solution

**Question 33:** Whose is the word "they" in paragraph 2 mentioned:

- A. Drivers**      B. Accidents      C. Citizens      D. Roads

**Question 34:** According to paragraph 2, which of the following is NOT a factor contributing to traffic accidents?

- A. Poor road conditions      B. Lack of signage      **C. Strict regulations**      D. Driver behavior

**Question 35:** What is the best summary of paragraph 3?

- A. The government has increased traffic accidents.  
B. Public awareness campaigns are ineffective.  
**C. Initiatives to improve traffic safety are being implemented.**  
D. Helmets are no longer required for drivers.

**Question 36:** The word "**exacerbates**" in paragraph 2 is opposite in meaning to which word?
